

# Resinex<sup>™</sup> KW-8

## Strong acid cation softening resin

Resinex™ KW-8 is a high purity, premium grade, pretreated, strongly acidic gel-type cation exchange resin specially designed for residential drinking water treatment. The KW-8 is a bead type, crosslinked, polystyrene divinylbenzene resin that offers excellent bead integrity and very low extractables. The product is highly suitable for a wide variety of drinking water treatment applications. Resinex™ KW-8 has a light amber color and is specially pretreated to remove taste, odor and color throw. Resinex™ KW-8 meets the requirements of FDA regulation CFR section 21, §173.25.

#### **Typical Properties**

Туре	Crosslinked polystyrene divinylbenzene
Form	Gel-type, amber, spherical beads
Functional group	Sulfonic acid
Whole bead count	95% min.
lonic form, as shipped	Na <sup>+</sup>
Bead size	16x40 US mesh (0.42-1.25 mm)
Effective size	0.45 - 0.55 mm
Bulk density	820 kg/m³
Real density	1.28 g/cm <sup>3</sup>
Water retention	45-50%
Total capacity	1.90 eq/l min.
Volume change Ca <sup>2+</sup> -> Na <sup>+</sup>	2% max.
Stability, temperature	120°C max.
Stability, pH	0-14
Color throw	25 APHA max.

## **Standard Design Conditions**

Bed depth	>750 mm
Service flow rate	8-40 l/h/l
Backwash expansion	50-75%
NaCl concentration for regeneration	8-15%
NaCl flow rate for regeneration	5-8 l/h/l
Rinse rate (slow)	1-3 bed volumes at regeneration flow rate
Rinse rate (fast)	3-6 bed volumes at service flow rate
Turbidity	<5.0 NTU
Free chlorine	<1 ppm

#### **Key Features and Benefits**

- Pretreated and Rinsed
   Guarantees minimal color throw and eliminates taste and odor
- High Integrity Beads
   Excellent resistance to mechanical degradation ensures low pressure drop
- Low Extractables FDA Compliance Specially treated to eliminate leaching of organic matter, assuring compliance with FDA regulation CFR section 21, §173.25.
- European ResAP (2004) 3 Approved Meets European Council Resolution AP (2004) 3 for use of ion exchange resins in the processing of food products
- WRAS BS 6920 Approved BS 6920 for cold water and hot water up to 85°C

### **Typical Applications**

- Residential softening
- Industrial softening
- Municipal softening

## Standard Packaging

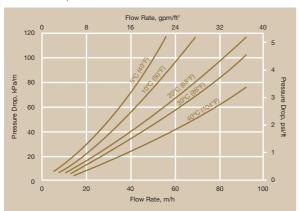

- 25 lit. PE valve bags
- 1000 lit. big bags

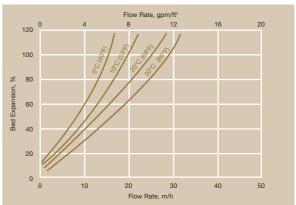

## Resinex\* KW-8

Strong acid cation softening resin

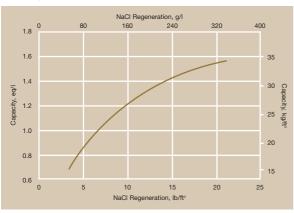

#### Pressure Drop

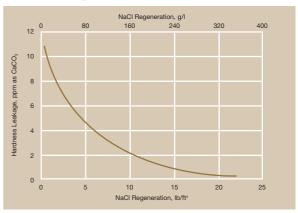

## **Backwash Expansion**

## Capacity Information

## Hardness Leakage Information

Capacity and Hardness Leakage graphs are shown assuming a service flow of 4 gpm/ft<sup>a</sup> (32 l/h/l) and total dissolved solids of 400 ppm and 20 grains of total hardness. The hardness leakage will increase and the capacity will decrease with increasing total dissolved solids and total hardness.

## **Product Packaging**

25 lit. polyethylene valve bags, 48 bags per pallet

Polypropylene FIBCs (big bags), 1000 lit.

NOTICE Jacobi Carbons reserves the right to change product specifications without prior notification. The information contained in this datasheet is intended to assist a customer in the evaluation and selection of products supplied by Jacobi Carbons. The customer is responsible for determining whether products and the information contained in this document are appropriate use. Jacobi Carbons assumes no obligation or liability for the usage of the information in this datasheet, no quarantess or warrantes, expressed on this data.

CAUTION Strong oxidizing agents such as nitric acid can react violently with ion exchange resins and cause explosive type reactions. Before using strong oxidants, consult sources knowledgeable in the handling of these materials.
